Jim Rice
Terminal Superintendent
Pier 91
Port of Seattle
Seattle, WA

Gentlemen:

(Done)

Confirming our discussion of 11/13/75 at the meeting held at Port of Seattle offices, regarding waste water overflow problems into the hot well of the Port of Seattle boiler house. It is Chemical Processors understanding that (1) the Port of Seattle will plug the hot well drain running to our tank farm from the hot well. (2) Chemical Processors, Inc. will install a high capacity pump and stand-by dump tank for waste water overflow. (3) Chemical Processors will install a high level alarm to act as a warning device should the waste water level rise above normal level.

R.E. handling

My insurance carrier informs me he has not received notification from the Port of Seattle that the lease bond held on the lease prior to the current lease has been released by the Port of Seattle. I would very much appreciate a letter to Mr. Bob Mauseth of Fred S. James notifying them that it is permissible for the carrier to release this bond.

I wish to thank both of you for calling the meeting yesterday and giving us the opportunity to quickly resolve what I know has been a problem to both of us over the last few months. Looking forward to our continued fine relationship with the Port of Seattle.

Very truly yours,

Ronald S. West
President, Chemical Processors, Inc.
